

Sidus Insights

Improving Outcomes for Patients and Providers

Sidus Insights EHR and Claims Data gives you access to highly curated, real-world data to power better decision-making

Crafted from its network of technology and healthcare provider partners, Sidus Insights' datasets can enrich clinical trials, enhance educational opportunities, and propel best practices through real-world data analysis. Whether the scope covers multiple specialties, or requires uniquely rich content for Cardiovascular, Psychiatric, or Women's Health, Sidus Insights can support your program.

465M Procedures

About Sidus Insights

Sidus Insights is an information technology and services company delivering real-world data, clinical trial logistics, and analytics to healthcare providers, payers, and researchers in industry and academia. Fueled by over 5 billion data points, our de-identified data sets are a uniquely rich resource. Delivering one of the largest and fastest growing ambulatory data sets, Sidus' Data Platform is used by biopharma, contract researchers, payers, and providers to drive more effective and more profitable clinical trials. Our customers include some of the largest medical schools in the U.S.A who not only use our Data Platform to drive clinical research but to educate and equip future physicians and researchers for the challenges they will face.

The Sidus Analytics Platform enables its thousands of physician practice users to gain better insight into the health of their patients and their practice. For more information, contact us at sales@sidusinsights.com
